Farm Location:		

National Priorities Addressed

Issue Questions	Responses
1. Will the treatment intended to implement using WHIP result in the restoration of declining or important native fish and wildlife habitats?	Yes <input type="radio"/> or No <input type="radio"/>
2. Are the planned restoration of declining or important native fish and wildlife habitat conservation practices of a self-sustaining nature such as a native perennial plant?	Yes <input type="radio"/> or No <input type="radio"/>
3. Will the treatment intended to implement using WHIP result in the protection, restoration, development or enhancement of fish and wildlife habitat to benefit at-risk species?	Yes <input type="radio"/> or No <input type="radio"/>
4. Will the treatment intended to implement using WHIP result in the protection, restoration, development or enhancement of wildlife habitat for Federally listed threatened and endangered wildlife species?	Yes <input type="radio"/> or No <input type="radio"/>
5. Will the treatment intended to implement using WHIP result in the reduction of invasive species on fish and wildlife habitats?	Yes <input type="radio"/> or No <input type="radio"/>
6. Will the treatment intended to implement using WHIP result in the protection, restoration, development or enhancement of declining or important aquatic wildlife species' habitats?	Yes <input type="radio"/> or No <input type="radio"/>

State Issues Addressed

Issue Questions	Responses
1. A federally listed AQUATIC species (T&E) would directly benefit from the project.	Yes <input type="radio"/> or No <input type="radio"/>
2. A state listed AQUATIC species (T&E) would directly benefit from the project.	Yes <input type="radio"/> or No <input type="radio"/>
3. A federal candidate or other AQUATIC species of concern will directly benefit from the project.	Yes <input type="radio"/> or No <input type="radio"/>
4. The project will restore historic anadromous or catadromous species migration (through stream blockage removal).	Yes <input type="radio"/> or No <input type="radio"/>
5. The historic upstream usable area available to aquatic species due to stream blockage removal is greater than 25 stream miles.	Yes <input type="radio"/> or No <input type="radio"/>
6. Stream length offered for restoration is greater than 0.5 miles.	Yes <input type="radio"/> or No <input type="radio"/>
7. The project includes a Living Shoreline or a restoration of submerged aquatic vegetation practice in a Chesapeake Bay tributary.	Yes <input type="radio"/> or No <input type="radio"/>
For questions 8-10, only ONE answer will be given.	
8. Width of restored riparian zone is 35 feet wide.	Yes <input type="radio"/> or No <input type="radio"/>
9. Width of restored riparian zone is 35-50 feet wide.	Yes <input type="radio"/> or No <input type="radio"/>
10. Width of restored riparian zone is greater than 50 feet wide.	Yes <input type="radio"/> or No <input type="radio"/>
